## User Guide

Delivery Challan & Invoicing System with FBR Integration

---

Version 2.0 • April 2026

# Table of Contents

- 1. Logging In
- 2. Dashboard Overview
- 3. Setting Up a Company
- 4. Adding Clients
- 5. Creating Delivery Challans
- 6. Understanding Challan Statuses
- 7. Importing a Purchase Order (PO)
- 8. Creating Invoices
- 9. Printing & Exporting Documents
- 10. Customizing Print Templates
- 11. FBR Digital Invoicing
- 12. Managing Users
- 13. Your Profile
- 14. Audit Logs
- 15. Quick Reference

# 1. Logging In

When you open the application, you will see the login screen with the company branding on the left and a login form on the right.

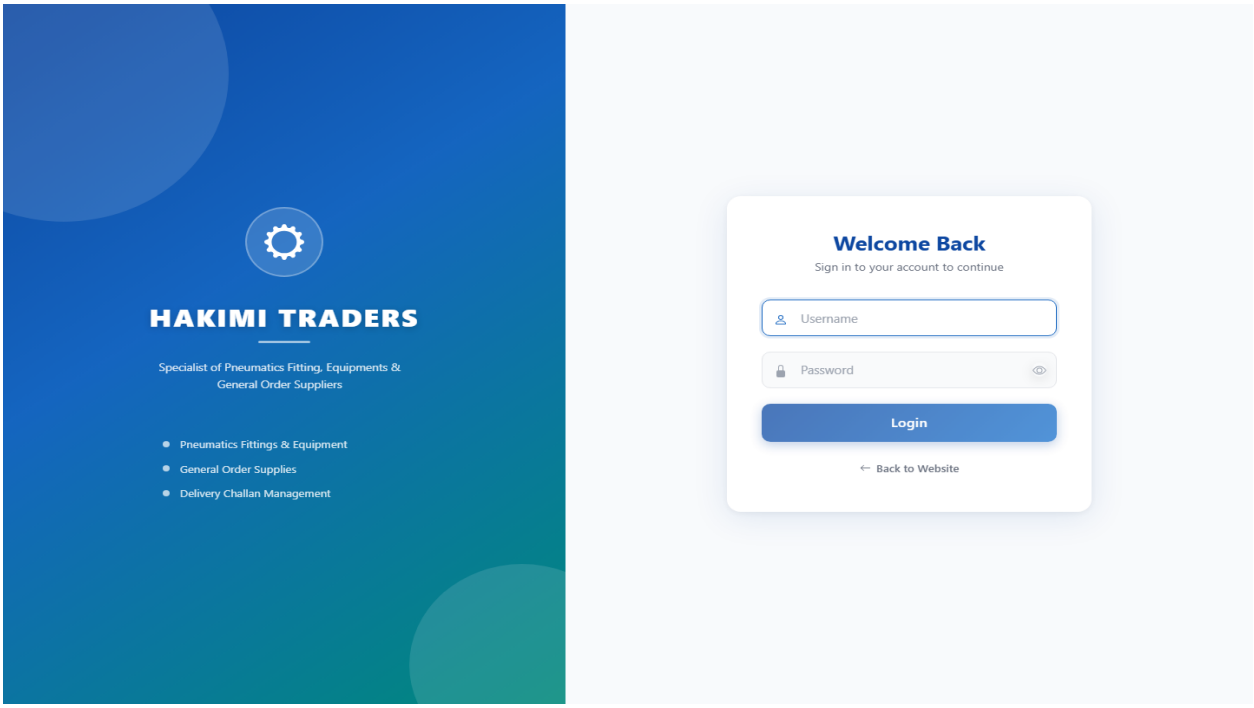

Figure 1: Login Page

**How to log in:**

1. Enter your **Username** in the first field
2. Enter your **Password** in the second field (click the eye icon to show/hide)
3. Click the **Login** button

> **Tip:** Default login is **admin / admin123**. Change this immediately after first login from My Profile.

Your login session lasts **8 hours**, after which you will need to log in again.

# 2. Dashboard Overview

The Dashboard is your home screen. It shows a quick summary of your business at a glance.

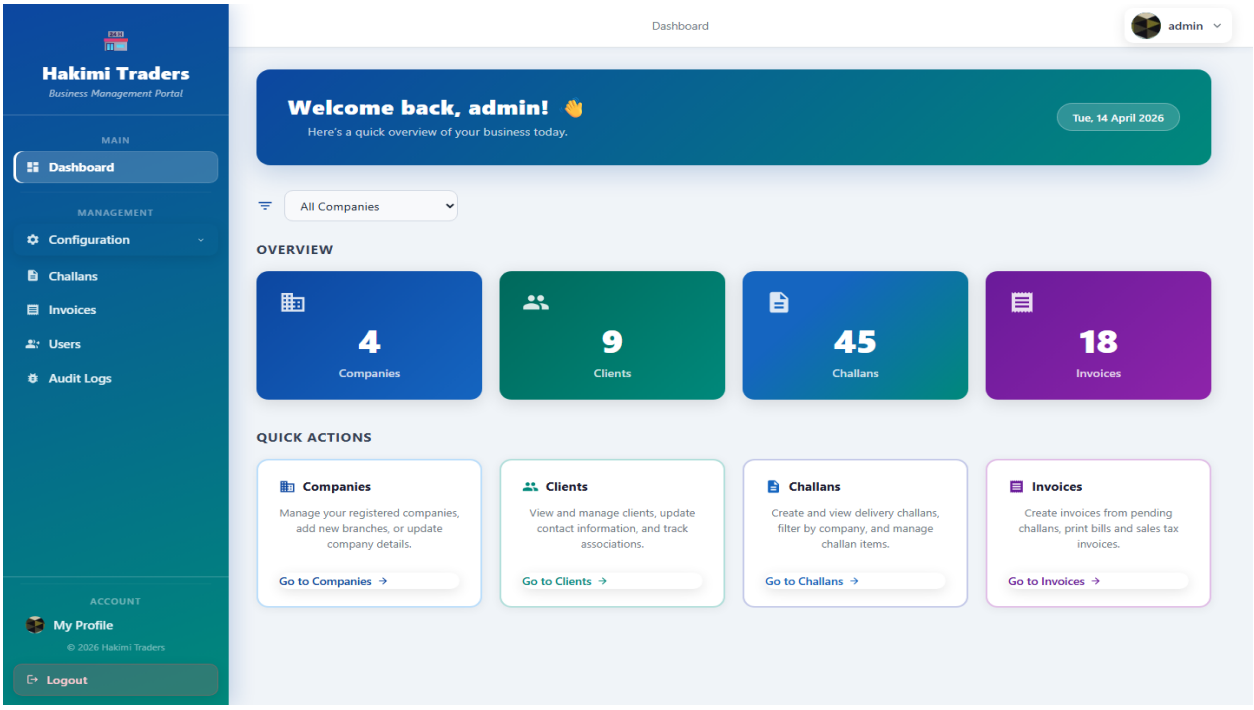

Figure 2: Dashboard with overview cards and quick actions

**What you see:**

- **Welcome banner** with your name and today's date
- **Company filter** dropdown to filter counts by company
- **Overview cards:** Companies, Clients, Challans, Invoices totals
- **Quick Actions:** Shortcut cards to jump to any section

## Sidebar Navigation

| Section | Pages |
|---|---|
| Main | Dashboard |
| Configuration | Companies, Clients, Item Types, Print Templates, FBR Settings |
| Management | Challans, Invoices |
| Admin | Users, Audit Logs |
| Account | My Profile, Logout |

# 3. Setting Up a Company

Before you can create challans or invoices, you need to register at least one company. Go to **Configuration > Companies List** in the sidebar.

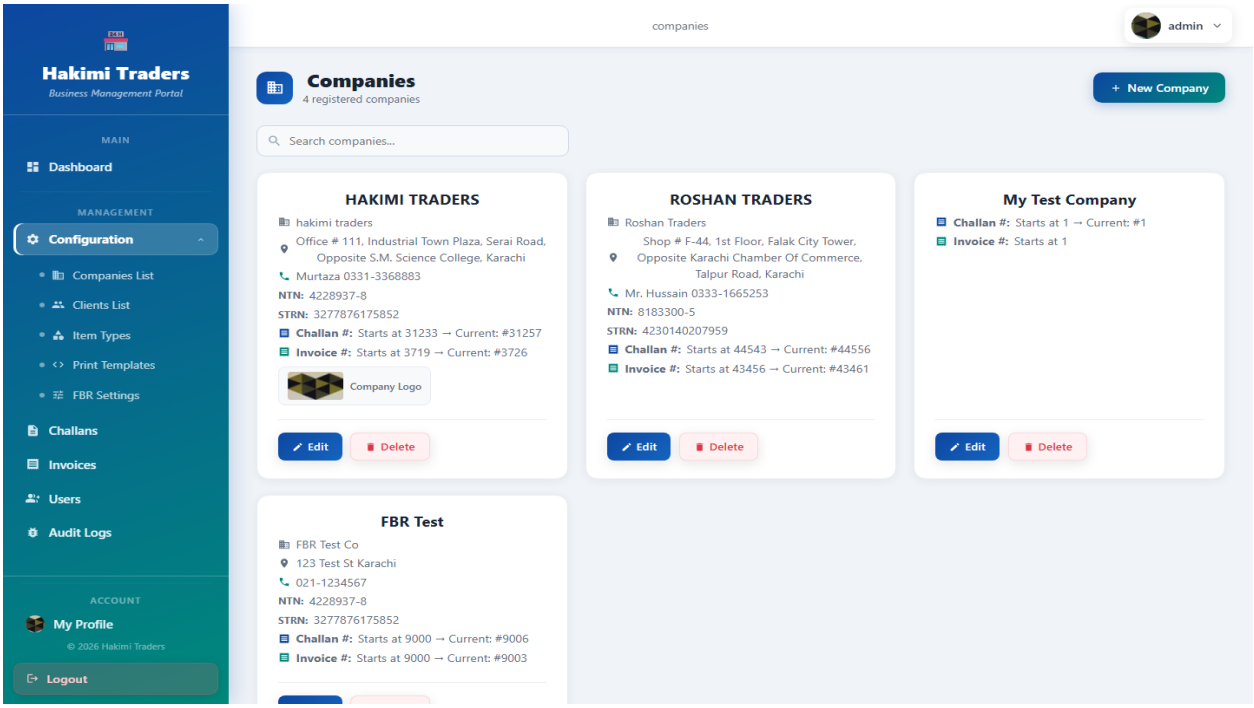

Figure 3: Companies List showing registered companies

## Creating a New Company

Click the **+ New Company** button (top right). Fill in the form:

| Field | Required? | Description |
|---|---|---|
| Company Name | Yes | Legal name of the business |
| Brand Name | No | Trade name if different from legal name |
| Full Address | No | Complete business address |
| Phone | No | Contact number |
| NTN | For FBR | National Tax Number |
| STRN | For FBR | Sales Tax Registration Number |
| Starting Challan # | Yes | First challan number (e.g., 1001) |
| Starting Invoice # | Yes | First invoice number (e.g., 5001) |
| Invoice Prefix | No | Optional prefix (e.g., "INV-" makes INV-5001) |

# 4. Adding Clients

Clients are the customers you deliver goods to. Each client belongs to one company. Go to **Configuration > Clients List**.

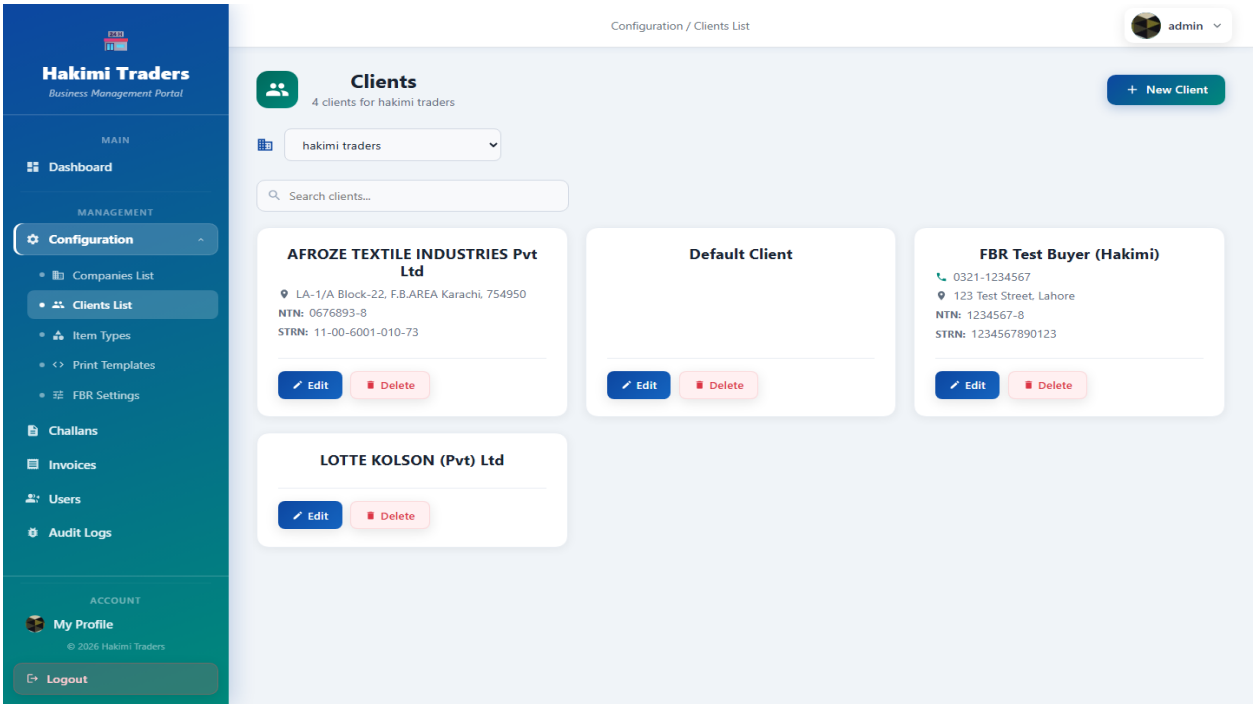

Figure 4: Clients List for a selected company

Select the company from the dropdown, then click **+ New Client**.

| Field | Required? | Description |
|---|---|---|
| Name | Yes | Client/customer name |
| Address | No | Delivery address |
| Phone / Email | No | Contact details |
| NTN / STRN | For FBR | Tax registration numbers |
| Site | No | Default delivery site |
| Registration Type | For FBR | Registered / Unregistered / CNIC |
| CNIC | If Unregistered | 13-digit CNIC number |
| Province | For FBR | Client's province (Punjab, Sindh, etc.) |

**Note:** You cannot delete a client that has existing delivery challans.

# 5. Creating Delivery Challans

A **Delivery Challan** (DC) is a document that records what items were delivered to a client. It is the starting point for invoicing.

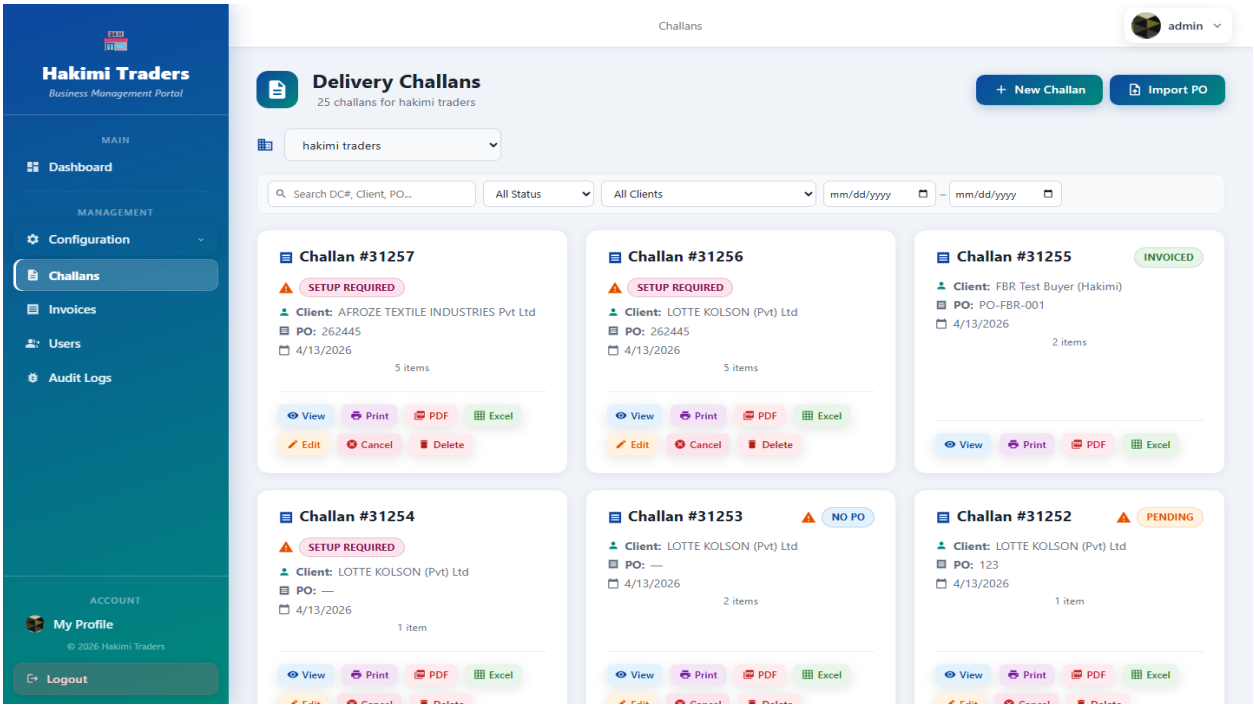

Figure 5: Challans page with status badges (Invoiced, Pending, Cancelled)

## Creating a New Challan

1. Go to **Challans** in the sidebar, select the company
2. Click **+ New Challan**
3. Select the **Client**, enter PO Number, PO Date, Delivery Date
4. Add items: Description (autocomplete), Quantity, Unit
5. Click **+ Add Item** for more lines, then **Save**

> **Tip:** The challan number is auto-generated. It takes the next number in the company's sequence.

## Challan Actions

| Button | What It Does |
|---|---|
| View | Open challan details in a popup |
| Print | Open print preview in browser |
| PDF | Download as PDF file |
| Excel | Export to Excel using uploaded template |
| Edit | Edit items (only for editable challans) |
| Cancel | Mark as cancelled |
| Delete | Permanently remove the challan |

# 6. Understanding Challan Statuses

Every challan has a **status** that controls what you can do with it. This is the most important concept in the system.

| Status | Color | Meaning | Can Edit? | Can Invoice? |
|---|---|---|---|---|
| Pending | Green | Ready to be included in an invoice | Yes | YES |
| No PO | Orange | Delivery done but PO not yet entered | Yes | No |
| Setup Required | Yellow | Company/client missing FBR fields | Yes | No |
| Invoiced | Blue | Already included in an invoice | No | N/A |
| Cancelled | Red | Cancelled by user | No | No |

## How Status is Determined

When you create a challan, the system automatically checks:

- If FBR fields are **missing** on company or client → **Setup Required**
- If FBR fields are complete and challan **has a PO** → **Pending**
- If FBR fields are complete but **no PO** → **No PO**

## When Can You Invoice?

**Only challans with 'Pending' status can be selected for invoicing.** This means the challan must have a PO number, and both the company and client must have all FBR fields filled (NTN, STRN, Province, etc.).

> **Tip:** If a challan shows 'Setup Required', check the warnings on the challan card -- they tell you exactly which fields are missing.

## Moving Between Statuses

| From | To | How |
|---|---|---|
| No PO | Pending | Add PO details (system auto-checks FBR readiness) |
| Setup Required | Pending | Fill missing FBR fields on company/client |
| Pending | Invoiced | Create an invoice that includes this challan |
| Invoiced | Pending | Delete the invoice (challan reverts) |
| Any editable | Cancelled | Click the Cancel button |

# 7. Importing a Purchase Order (PO)

Instead of entering items manually, you can import them from a PO document. Click **Import PO** on the Challans page.

## Two Ways to Import

| Method | How | Best For |
|---|---|---|
| Upload PDF | Click Upload, select file (max 10MB) | PDF purchase orders |
| Paste Text | Copy-paste PO text, click Parse | Email/Word PO text |

The system uses **Google Gemini AI** to read PDFs and extract PO number, date, and line items. For pasted text, it uses pattern matching first (faster and more accurate for structured text), with AI as fallback.

> **Tip:** If PDF parsing misses items, try copying the text and using Paste Text instead.

# 8. Creating Invoices

Invoices are generated from one or more **Pending** delivery challans. The system bundles delivery items and lets you set prices.

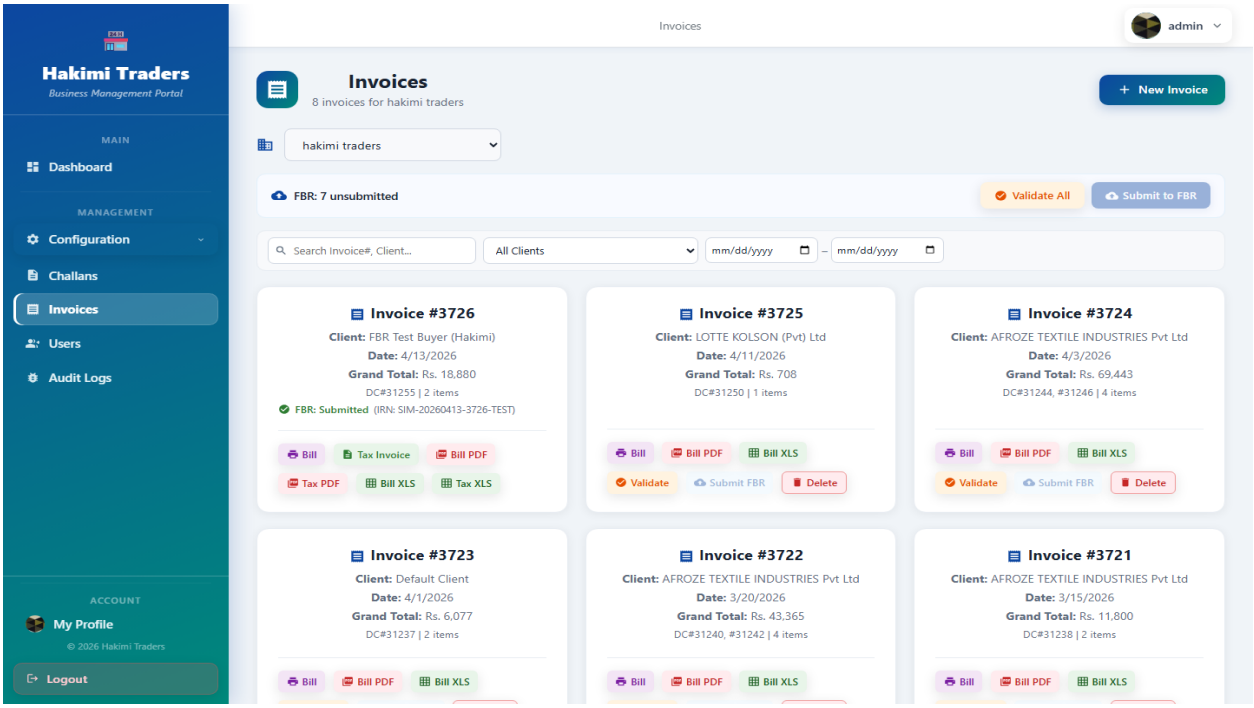

Figure 6: Invoices page showing bills with grand totals and linked challans

## Creating a New Invoice

1. Go to **Invoices**, select company, click **+ New Invoice**
2. **Select challans** -- check boxes next to Pending challans (same client)
3. **Set prices** -- enter Unit Price for each item
4. **Set GST rate** (0-100%) and optional Payment Terms
5. System calculates: Subtotal, GST Amount, Grand Total, Amount in Words
6. Click **Create Invoice**

When an invoice is created, all selected challans change from **Pending** to **Invoiced**. The invoice number is auto-generated.

> **Important:** To correct an invoice, delete it (challans revert to Pending) and create a new one. You cannot delete FBR-submitted invoices.

# 9. Printing & Exporting Documents

## Challan Documents

| Button | Format | Description |
|---|---|---|
| Print | Browser | Opens print preview |
| PDF | PDF file | Downloads as PDF |
| Excel | XLSX file | Exports using uploaded template |

## Invoice Documents

| Button | Format | Description |
|---|---|---|
| Bill | Browser | Business invoice preview |
| Bill PDF | PDF file | Business invoice as PDF |
| Bill XLS | XLSX file | Business invoice as Excel |

# 10. Customizing Print Templates

The Template Editor lets you design how printed documents look. Go to **Configuration > Print Templates**.

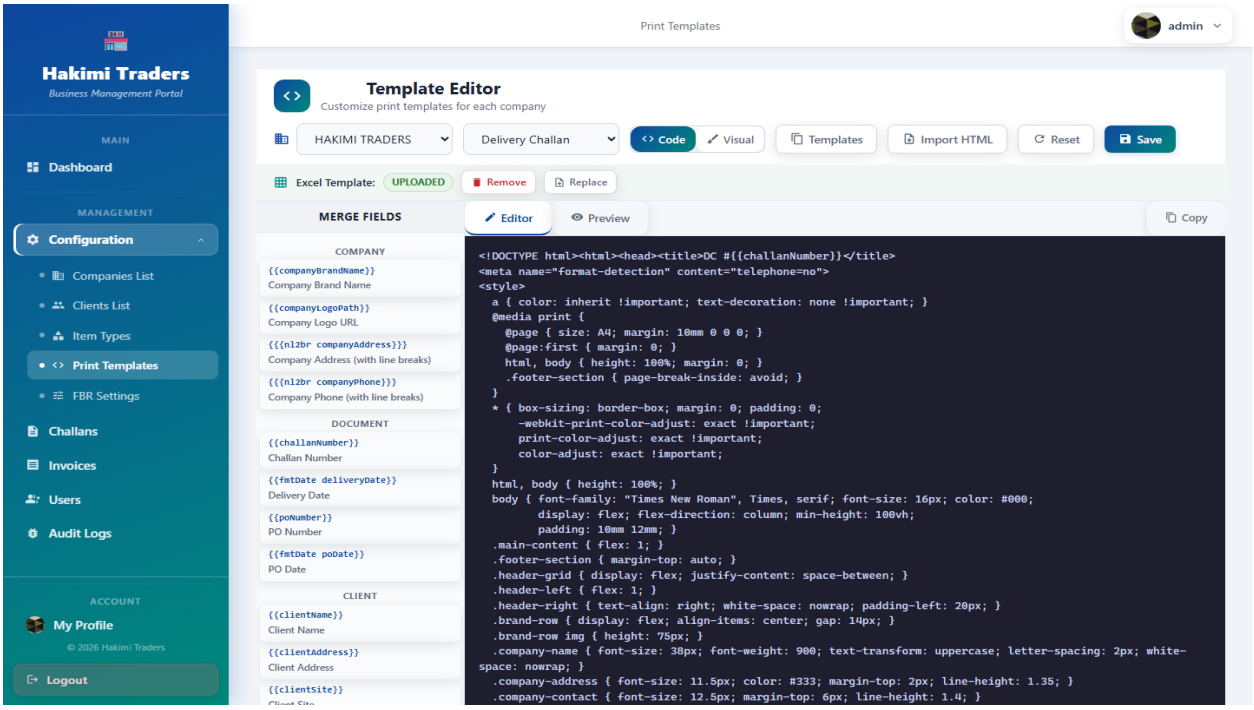

Figure 7: Template Editor with merge fields panel and HTML code editor

## Two Editor Modes

- **Code Editor** -- Write HTML/CSS directly. Merge fields panel on the left.
- **Visual Editor** -- Drag-and-drop builder (GrapesJS). Click 'Visual' to switch.

## Common Merge Fields

| Merge Field | Replaced With |
|---|---|
| {{companyBrandName}} | Company brand name |
| {{clientName}} | Client name |
| {{challanNumber}} | Challan number |
| {{invoiceNumber}} | Invoice number |
| {{fmtDate deliveryDate}} | Formatted delivery date |
| {{poNumber}} | PO number |
| {{grandTotal}} | Invoice grand total |
| {{amountInWords}} | Total amount in words |
| {{#each items}}...{{/each}} | Loop over line items |

# 11. FBR Digital Invoicing

The system integrates with Pakistan's **Federal Board of Revenue (FBR)** Digital Invoicing portal to submit invoices electronically.

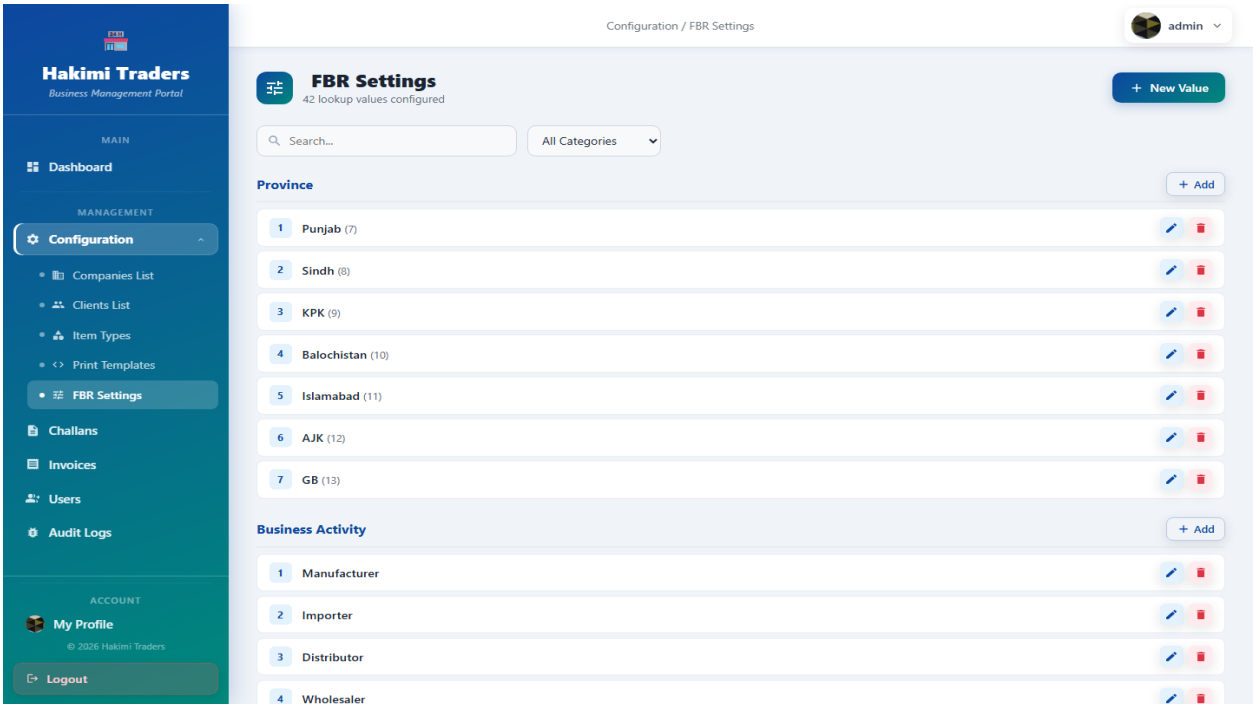

Figure 8: FBR Settings page with provinces, business activities, and sectors

## FBR Setup - Company Side

| Field | Description |
|---|---|
| NTN / STRN | Must match FBR registration |
| Province | Select from dropdown (Punjab, Sindh, KPK, etc.) |
| Business Activity | Manufacturer, Importer, Distributor, etc. |
| Sector | Industry sector (Steel, FMCG, Textile, etc.) |
| FBR Token | Bearer token from FBR IRIS portal |
| FBR Environment | 'Sandbox' for testing, 'Production' for live |

## FBR Setup - Client Side

| Field | Description |
|---|---|
| NTN / STRN | Client's tax registration numbers |
| Registration Type | Registered, Unregistered, or CNIC |
| CNIC | Required if Unregistered/CNIC type |
| Province | Client's province |

## Submitting an Invoice to FBR

1. Create an invoice normally
2. Ensure all FBR fields are filled on company and client
3. Open the invoice, click **Validate with FBR** (optional dry run)
4. Click **Submit to FBR**
5. If successful: receive **IRN** (Invoice Reference Number)
6. If failed: check error message, fix, and retry

# 12. Managing Users

Only **Admin** users can manage other users. Go to **Users** in the sidebar.

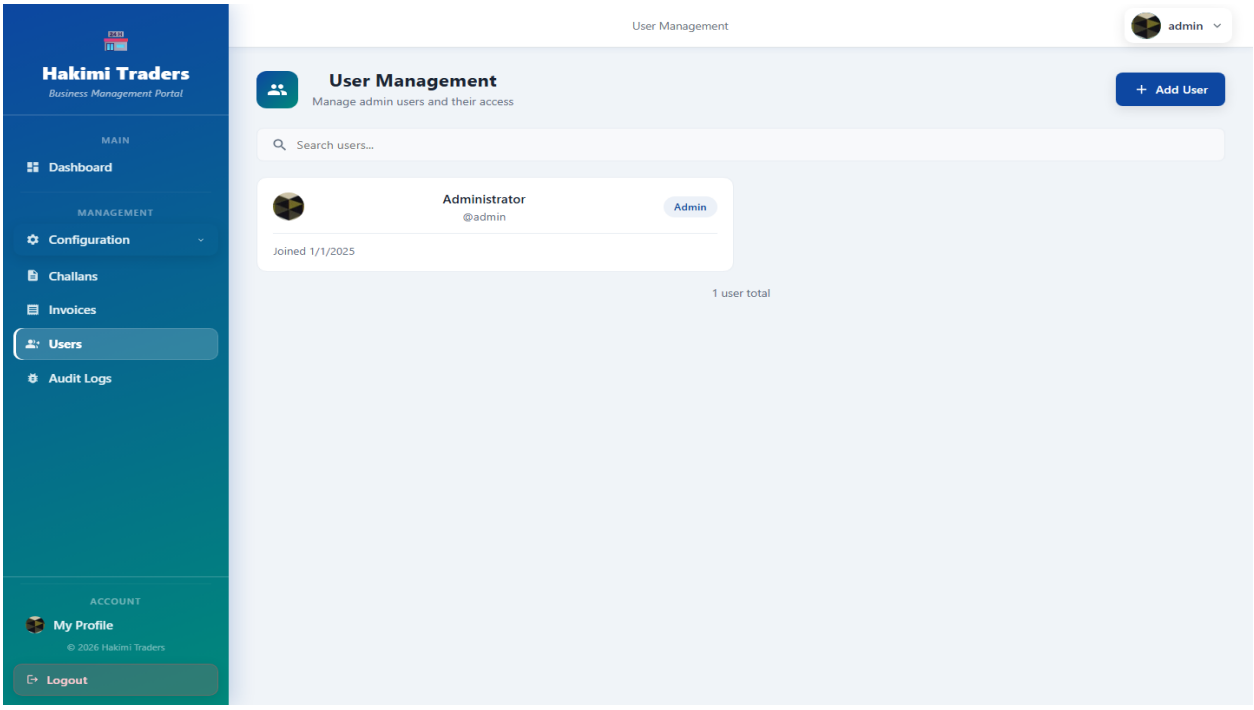

Figure 9: User Management page

Click **+ Add User** to create a new user. Fill in username, full name, password (min 6 chars), and role.

> **Note:** You cannot delete the default admin user (ID 1) or yourself.

# 13. Your Profile

Go to **My Profile** in the sidebar to manage your account.

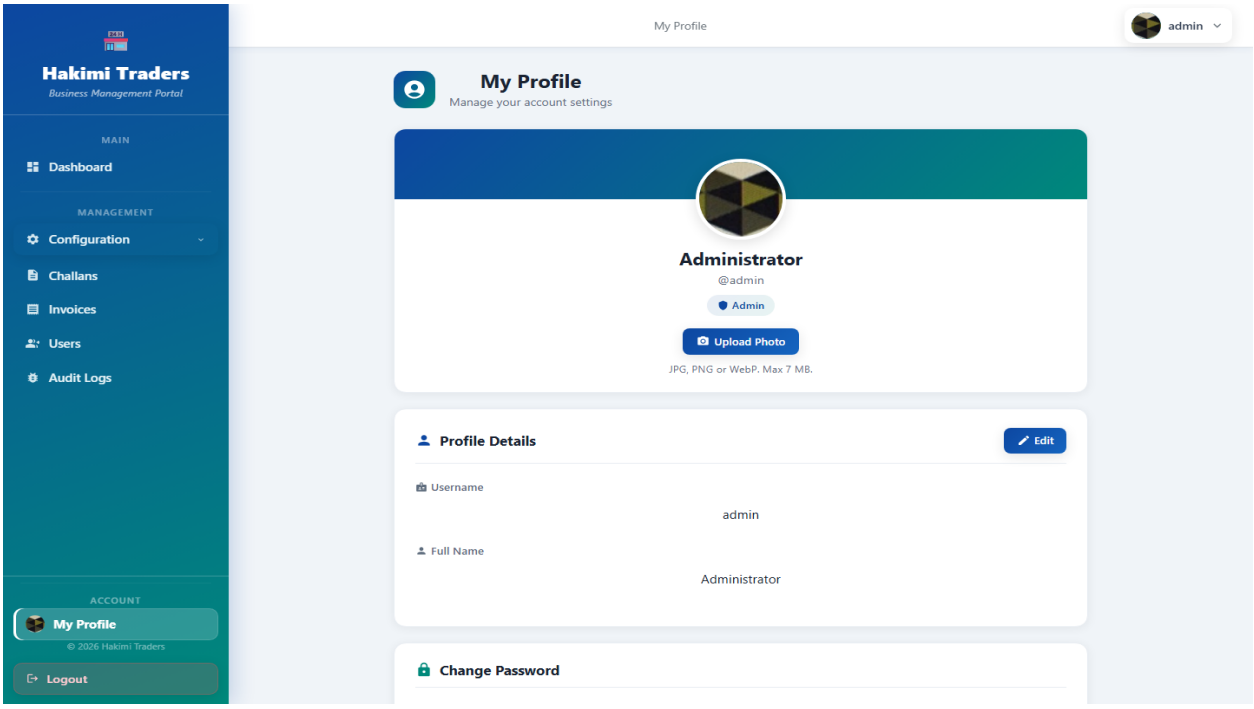

Figure 10: Profile page with avatar and details

From here you can: edit your username/full name, change your password, and upload an avatar (JPG/PNG/WebP, max 7 MB).

# 14. Audit Logs

Audit Logs track all system errors and warnings. Admin only. Go to **Audit Logs** in the sidebar.

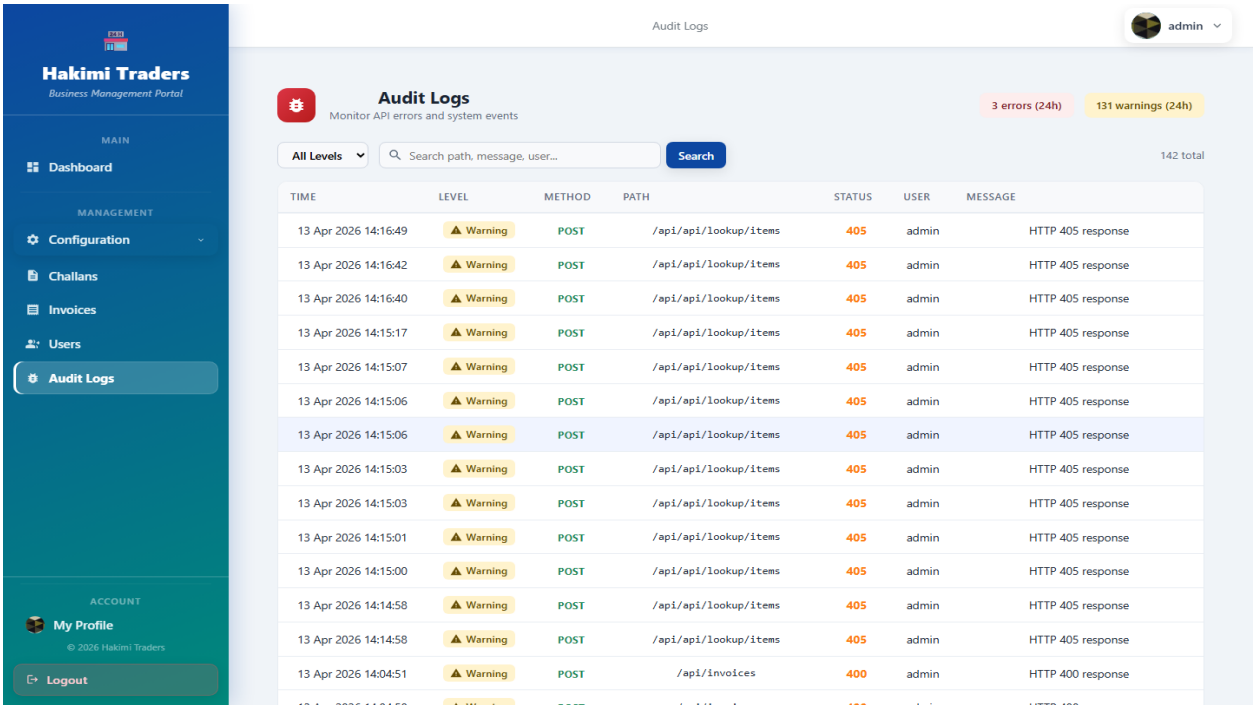

Figure 11: Audit Logs with filters and summary badges

Filter by level (Error/Warning), search by path or user, and view summary badges showing 24-hour counts.

# 15. Quick Reference

## Complete Application Flow

- 1. Set up Company (with NTN, STRN, FBR fields)
- 2. Add Clients (with NTN, STRN, FBR fields)
- 3. Create Delivery Challans (with items) or Import from PO
- 4. Challan becomes 'Pending' when ready
- 5. Create Invoice (select pending challans, set prices)
- 6. Print / Export (Bill, Tax Invoice, PDF, Excel)
- 7. Submit to FBR (optional, receive IRN)

## Status Quick Reference

| I Want To... | Challan Must Be... |
|---|---|
| Edit items | Pending, No PO, or Setup Required |
| Add PO details | No PO or Setup Required |
| Include in invoice | Pending ONLY |
| Print / export | Any status |
| Cancel | Pending, No PO, or Setup Required |
| Delete | Pending, No PO, or Setup Required |

## Troubleshooting

| Problem | Solution |
|---|---|
| Session expired | Log in again (sessions last 8 hours) |
| Cannot delete client | Client has challans -- remove them first |
| Cannot delete invoice | Invoice submitted to FBR -- permanent |
| Challan stuck on Setup Required | Check warnings, fill missing FBR fields |
| PO import shows no items | Try Paste Text instead of PDF (or vice versa) |
| Print looks wrong | Check Print Templates, ensure merge fields are correct |
| FBR submission fails | Check Audit Logs, verify token and environment |
